Mr. Vic Neufeld reports

### **APHRIA SUCCESSFULLY AMENDS LICENSE TO ALLOW FOR WHOLESALE SHIPPING**

Aphria Inc. has successfully amended its licence with Health Canada to allow for wholesale shipping of medical marijuana in dried bud form.

"We are pleased to be the first of the licensed producers in Canada to commence wholesale shipping," stated Vic Neufeld, President and Chief Executive Officer of Aphria. "Expanding our growth strategy to include wholesale is a competitive differentiator in a retail-focused category. With this amendment to our license we are currently the only company positioned to sell medical marijuana to other licensed producers in Canada."

Neufeld added, "With nearly 60 years' experience in the agri-business, our team continues to demonstrate that we can grow medical marijuana more cost effectively and faster, with less spoiled product, in our technologically advanced greenhouses. As a result, in just over three months we have built-up our inventory to approximately 300 kilograms as we ramp up our retail sales and will begin to drawdown on this inventory as we roll out our wholesale strategy."

Aphria also announced that it successfully renewed its license to cultivate and sell marijuana under the Marihuana for Medical Purposes Regulations ("MMPR"). However, commensurate with its announcement last week of a two-phase expansion plan, the first part of which will commence immediately, Aphria will be working with Health Canada to increase the amount it is permitted to cultivate and sell under the MMPR from its current annualized growing capacity of 1,400 kilograms to 2,500 kilograms of medical marijuana annually.

We seek Safe Harbor.
